Price New Masonry Cleaner

Brick Clean #77
Brick Clean - Vanadium

Price New Masonry Cleaner

Brick Clean #77

Price Brick Clean #77 is formulated to clean excess mortar, job dirt, etc. from new masonry, such as light, red, dark colored brick and tile not subject to metallic stains.

Price Brick Clean #77 is a unique combination of inhibitor (inhibited against action on aluminum, glass with control action, etc.) chelating agent (special action against lime, calcium, cement, lime smears, etc.) and blend of acids (consists of organic and inorganic acid for special action against cement, lime and all kinds of mortar).

For cleaning interior surfaces, protect the floor and provide adequate ventilation. Clean masonry before the installation of light fixtures, doors, hardware and bathroom plumbing.

Brick Clean - Vanadium

Price Brick Clean - Vanadium is an advanced development in cleaning metallic stain-prone new brick masonry. It contains a special sequestering agent, surfactant and blend of acids.

Price Brick Clean - Vanadium is specially formulated to clean excess mortar, job dirt, etc. from new brick masonry which is prone to vanadium (green stain), manganese (dark brown) and other metallic stains.

Price Brick Clean products are acidic products and should be handled according to label instructions. Protect and test all non-masonry surfaces including vegetation.

Masonry Cleaner

Always test first and refer to our product data sheets for additional product information and dilution guide.

1

Thoroughly pre-wet the surface to be cleaned.

2

Apply diluted solution of cleaner with brush.

3

Let set 2 to 3 minutes. Scrape off excess mortar. Reapply diluted solution.

4

Rinse thoroughly.
